

**40 CFR Part 55**

[FRL-5140-8]

**Outer Continental Shelf Air Regulations; Consistency Update for California****AGENCY:** Environmental Protection Agency ("EPA").**ACTION:** Notice of proposed rulemaking ("NPRM")—consistency update.

**SUMMARY:** EPA is proposing to update a portion of the Outer Continental Shelf ("OCS") Air Regulations. Requirements applying to OCS sources located within 25 miles of states' seaward boundaries must be updated periodically to remain consistent with the requirements of the corresponding onshore area ("COA"), as mandated by section 328(a)(1) of the Clean Air Act ("the Act"), the Clean Air Act Amendments of 1990. The portion of the OCS air regulations that is being updated pertains to the requirements for OCS sources for which the Santa Barbara County Air Pollution Control District (Santa Barbara County APCD), South Coast Air Quality Management District (South Coast AQMD), and the Ventura County Air Pollution Control District (Ventura County APCD) are the designated COAs. The OCS requirements for the above Districts, contained in the Technical Support Document, are proposed to be incorporated by reference into the Code of Federal Regulations and are listed in the appendix to the OCS air regulations. Proposed changes to the existing requirements are discussed below.

**DATES:** Comments on the proposed update must be received on or before February 17, 1995.

**ADDRESSES:** Comments must be mailed (in duplicate if possible) to: EPA Air Docket (A-5), Attn: Docket No. A-93-16 Section VII, Environmental Protection Agency, Air and Toxics Division, Region 9, 75 Hawthorne St., San Francisco, CA 94105.

**Docket:** Supporting information used in developing the proposed notice and copies of the documents EPA is proposing to incorporate by reference are contained in Docket No. A-93-16 (Section VII). This docket is available for public inspection and copying Monday-Friday during regular business hours at the following locations:

**SUPPLEMENTARY INFORMATION:****Background**

On September 4, 1992, EPA promulgated 40 CFR part 55<sup>1</sup>, which established requirements to control air pollution from OCS sources in order to attain and maintain federal and state ambient air quality standards and to comply with the provisions of part C of title I of the Act. Part 55 applies to all OCS sources offshore of the States except those located in the Gulf of Mexico west of 87.5 degrees longitude. Section 328 of the Act requires that for such sources located within 25 miles of a state's seaward boundary, the requirements shall be the same as would be applicable if the sources were located in the COA. Because the OCS requirements are based on onshore requirements, and onshore requirements may change, section 328(a)(1) requires that EPA update the OCS requirements as necessary to maintain consistency with onshore requirements.

Pursuant to § 55.12 of the OCS rule, consistency reviews will occur (1) at least annually; (2) upon receipt of a Notice of Intent (NOI) under § 55.4; and (3) when a state or local agency submits a rule to EPA to be considered for incorporation by reference in part 55. This NPRM is being promulgated in response to the submittal of rules by three local air pollution control agencies. Public comments received in writing within 30 days of publication of this notice will be considered by EPA before promulgation of the final updated rule.

Section 328(a) of the Act requires that EPA establish requirements to control air pollution from OCS sources located within 25 miles of states' seaward boundaries that are the same as onshore requirements. To comply with this statutory mandate, EPA must incorporate applicable onshore rules into part 55 as they exist onshore. This limits EPA's flexibility in deciding which requirements will be incorporated into part 55 and prevents

EPA from making substantive changes to the requirements it incorporates. As a result, EPA may be incorporating rules into part 55 that do not conform to all of EPA's state implementation plan (SIP) guidance or certain requirements of the Act. Consistency updates may result in the inclusion of state or local rules or regulations into part 55, even though the same rules may ultimately be disapproved for inclusion as part of the SIP. Inclusion in the OCS rule does not imply that a rule meets the requirements of the Act for SIP approval, nor does it imply that the rule will be approved by EPA for inclusion in the SIP.

**EPA Evaluation and Proposed Action**

In updating 40 CFR part 55, EPA reviewed the state and local rules submitted for inclusion in part 55 to ensure that they are rationally related to the attainment or maintenance of federal or state ambient air quality standards or part C of title I of the Act, that they are not designed expressly to prevent exploration and development of the OCS and that they are applicable to OCS sources. 40 CFR 55.1. EPA has also evaluated the rules to ensure they are not arbitrary or capricious. 40 CFR 55.12(e). In addition, EPA has excluded administrative or procedural rules<sup>2</sup> and requirements that regulate toxics which are not related to the attainment and maintenance of federal and state ambient air quality standards.

A. After review of the rule submitted by the Santa Barbara County APCD against the criteria set forth above and in 40 CFR part 55, EPA is proposing to make the following rule applicable to OCS sources for which the Santa Barbara County APCD is designated as the COA. None of the existing OCS requirements was deleted.

The following new rule was submitted by the District to be added:

Rule 702 General Conformity (Adopted 10/20/94)

B. After review of the rules submitted by South Coast AQMD against the criteria set forth above and in 40 CFR part 55, EPA is proposing to make the following rules applicable to OCS sources for which the South Coast AQMD is designated as the COA.

<sup>2</sup> After delegation, each COA will use its administrative and procedural rules as onshore. In those instances where EPA does not delegate authority to implement and enforce part 55, EPA will use its own administrative and procedural requirements to implement the substantive requirements. 40 CFR 55.14(c)(4).

<sup>1</sup> The reader may refer to the Notice of Proposed Rulemaking, December 5, 1991 (56 FR 63774), and the preamble to the final rule promulgated September 4, 1992 (57 FR 40792) for further background and information on the OCS regulations.

### Executive Order 12291 (Regulatory Impact Analysis)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291. This exemption continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

### Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires each federal agency to perform a Regulatory Flexibility Analysis for all rules that are likely to have a "significant impact on a substantial number of small entities." Small entities include small businesses, organizations, and governmental jurisdictions.

As was stated in the final regulation, the OCS rule does not apply to any

small entities, and the structure of the rule averts direct impacts and mitigates indirect impacts on small entities. This consistency update merely incorporates onshore requirements into the OCS rule to maintain consistency with onshore regulations as required by section 328 of the Act and does not alter the structure of the rule.

The EPA certifies that this notice of proposed rulemaking will not have a significant impact on a substantial number of small entities.

### Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in the final OCS rulemaking dated September 4, 1992 under the provisions of the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2060-0249. This consistency update does not add any further requirements.

[OPP-300360; FRL-4910-8]

RIN 2070-AC18

**Acephate, Triadimefon, Iprodione, and Imazalil; Revocation of Food Additive Regulations****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to revoke food additive regulations for the pesticides acephate, triadimefon (1-(4-chlorophenoxy)-3,3-dimethyl-1-(1H-1,2,4-triazol-1-yl)-2-butanone), iprodione, and imazalil, which EPA has determined "induce cancer" within the meaning of the Delaney clause of section 409 of the Federal Food, Drug and Cosmetic Act (FFDCA). As a result of a 1992 court decision regarding the Delaney clause, EPA has initiated the process of revoking those section 409 tolerances for pesticides found to "induce cancer." This proposed rule is the second in a series of proposals to revoke affected regulations under section 409 of the FFDCA.

**DATES:** Written comments, identified by the document control number [OPP-300360], must be received on or before April 18, 1995.

**SUPPLEMENTARY INFORMATION:****I. Introduction****A. Statutory Background**

The Federal Food, Drug and Cosmetic Act (FFDCA) (21 U.S.C. 301 et seq.) authorizes the establishment of maximum permissible levels of pesticides in foods, which are referred to as "tolerances" (21 U.S.C. 346a, 348). Without such a tolerance or an exemption from a tolerance, a food containing a pesticide residue is "adulterated" under section 402 of the FFDCA and may not be legally moved in interstate commerce (21 U.S.C. 342). Monitoring and enforcement of pesticide residues are carried out by the U.S. Food and Drug Administration (FDA) and the United States Department of Agriculture (USDA).

The FFDCA governs tolerances for raw agricultural commodities (RACs) and processed foods separately. For pesticide residues in or on RACs, EPA establishes tolerances, or exemptions from tolerances when appropriate, under section 408. In processed foods, food additive regulations setting maximum permissible levels of pesticide residues are established under section 409. Section 409 tolerances are needed, however, only for certain pesticide residues in processed food. Under section 402(a)(2) of the FFDCA, no section 409 tolerance is required if any pesticide residue in a processed food is equal to or below the tolerance for that pesticide in or on the RAC from which it was derived and all other conditions of section 402(a)(2) are met. This exemption in section 402(a)(2) is commonly referred to as the "flow-through" provision because it allows the section 408 raw food tolerance to flow through to the processed food form. Thus, a section 409 tolerance is necessary to prevent foods from being deemed adulterated when the concentration of the pesticide residue in a processed food is greater than the tolerance prescribed for the RAC, or if
